

ETHERNET SERVICES

BE A LOCAL HERO

No LAN is an island. Well, it shouldn't be. Especially if branch offices need fast and reliable access to centralised corporate resources. It'd be nice too if you didn't have to fret about blowing a hole in your budget as you shunt humungous amounts of data from one site to another. So why not connect your LANs and WANs using Ethernet? Our point-to-point Ethernet circuits are superb for connecting buildings in a town, or perhaps linking up a sprawling business park. We even offer a nationwide service. A low-cost alternative to leased lines is not wishful thinking. It's here. Now.

Speeds? Relax. Our P2P Ethernet circuits throttle up to a blistering 10Gbit/s and it's all yours, no sharing. If you need to go faster, our High Capacity Services can turbo charge to a staggering 100Gbit/s.

But who knows what bandwidth you might need in the future. That's why we're flexible. Our Ethernet data rates start at 10Mbit/s, but, give us the nod, and we can step on the accelerator – in increments – to give the bandwidth you want. No fuss.

And say goodbye to outside security threats. At distances up to 25km, you get dedicated site-to-site connectivity. That's right.

A superfast fibre connection all to yourself. Security doesn't get any tighter.

Here's what to expect...

- All products ISO accredited
- Government requirements met for the Public Services Network
- Proactive management for higher speed services
- Optional web monitoring tools
- Flat-rate pricing makes budget planning easier
- Bandwidth upgrades available to suit changing business needs
- Seven Classes of Service – plenty of scope to prioritise network traffic

Our National Ethernet service is no slouch, either. With Virgin Media Business, long-distances won't disrupt your high-res video conferencing, VoIP or media-rich apps. Our stringent targets on latency, jitter and packet loss see to that.

Better still, by having a virtual LAN running across our nationwide fibre-optic network, traffic separation is done at Layer 2. Vital business communications will not mingle with internet ho polloi you can't trust. More peace of mind.

Choose our Ethernet services, though, and we don't think job done. At data rates of 100Mbit/s and above, our network gurus are watching your service performance like hawks. Around the clock. Issues are fixed before they even cause problems. You're in safe hands.

And no need to stress about nasty surprises on the bill. It's a fixed annual charge, regardless of data usage. Phew.

Who's it good for ?

Businesses wanting to avoid costly leased lines for LAN-to-LAN connectivity across distances of up to 25km, but still maintain security and bandwidth flexibility.

Organisations wishing to extend LAN-based apps across nationwide WANs without performance loss.

Quick product comparisons
